Ankit Kumar Sinha

Full-Stack Engineer | React.js | Next.js | Angular | Node.js | TypeScript

Ahmedabad, Gujarat, India | +91 7870229009 | araaj953@gmail.com

LinkedIn: linkedin.com/in/ankit-sinha-58702a204 | GitHub: github.com/Ankit-Sinha70 | Portfolio: ankit-sinha70.github.io

PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of experience building responsive, high-performance web applications across financial analytics, automotive SaaS, enterprise productivity, and restaurant management. Deep hands-on work in React.js, Next.js, Angular, and TypeScript, spanning reusable component libraries, role-based access control, interactive data visualization, and Lighthouse-optimized performance, backed by full-stack delivery across Node.js, Express.js, and MongoDB and AI/LLM integrations (Anthropic Claude, OpenAI, Gemini). Proven record of on-time delivery across 5+ concurrent client engagements.

TECHNICAL SKILLS

Frontend: React.js, Next.js 16, Angular 10+, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design

State Management: Redux, Zustand

UI and Styling: Tailwind CSS v4, ShadCN UI, Angular Material, Kendo UI, Material UI, Radix UI, Base UI, accessible component design

Data Visualization: Recharts, Plotly, Kendo Charts

Performance and 3D: Lighthouse auditing, lazy loading, asset optimization, Three.js, Vite

Backend: Node.js, Express.js, MongoDB, REST API Design, JWT Authentication, OAuth 2.0, Auth0

SaaS and Infrastructure: Turborepo (monorepo), npm workspaces, Stripe (checkout, webhooks, subscriptions), Upstash Redis, Zod, Winston, Vercel

AI and LLM Integration: Anthropic Claude API, OpenAI API, Google Gemini, Groq

CMS and i18n: Strapi CMS, next-intl

Testing and Tools: React Testing Library, Postman, Git, GitHub, GitLab, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | Brainerhub Solutions, Ahmedabad, Gujarat Feb 2023 - Present

- Delivered production-grade full-stack applications for 5+ clients across restaurant, SaaS, financial analytics, and enterprise domains using React.js, Next.js, Angular, Node.js, and TypeScript.
- Optimized RESTful API integrations and payload handling, cutting average response time by 30% and improving application scalability under sustained load.
- Engineered 15+ reusable, accessible UI components with Tailwind CSS and ShadCN, standardizing design patterns and accelerating feature delivery across multiple codebases.
- Partnered with a cross-functional team of 8 designers, backend engineers, and product managers, shortening release cycles by 15% through improved sprint planning and task automation.
- Owned end-to-end delivery timelines for 5+ concurrent client engagements, consistently meeting project milestones.

Key Client Projects

QISquare - Equity Research and Financial Analytics SaaS | Angular 10, TypeScript, Auth0, Kendo UI Jun 2026 - Present

Institutional equity-research SaaS platform serving financial analysts with advanced data visualization and automated reporting.

- Upgrading the platform off a deprecated Angular version, modernizing legacy modules and dependencies while preserving existing production functionality.
- Diagnosed and corrected data flows in the market-pricing and SEC EDGAR filing ingestion pipelines, restoring accuracy of the financial data surfaced across the platform.
- Maintained and extended reference-data and financial-statement modules, including Index Tags, Value Chain, and cascading country, currency, and exchange filters built with Angular Material and Kendo UI data grids.
- Extended role and permission-based access control to additional routes and modules within an established Auth0 JWT setup, working across Angular route guards and HTTP interceptors for secure multi-tenant access.
- Contributed to interactive analytical reports covering peer comparison, trend analysis, CAGR, manipulation detection, and Beta/CAPM valuation models, with interactive charts and PDF and Excel export.

IATF Solutions Toolbox - Automotive Quality Compliance SaaS Suite Jan 2026 - May 2026

Next.js 16, React 19, TypeScript, Turborepo, Stripe, Upstash Redis, Anthropic, OpenAI, Gemini, Strapi, Zod.

- Architected a Turborepo monorepo shipping 4 AI-powered quality-engineering tools plus a Strapi CMS-driven marketing site, backed by shared UI, config, and API-client packages.

- Engineered a provider-agnostic AI abstraction across Anthropic, OpenAI, and Gemini that generates audit-ready compliance artifacts, including root-cause analyses, compliance matrices, and management-review narratives, from structured input.
- Implemented end-to-end Stripe billing with checkout, webhooks, and credit-based usage metering, backed by Upstash Redis for session storage and API rate limiting.
- Automated multi-format document export pipelines producing .xlsx, .pdf, and .docx outputs from Zod-validated schemas, removing manual report preparation for end users.

Solution to Share GmbH - Calendar Plus and File Manager | React.js, TypeScript Jun 2025 - May 2026

Enterprise productivity SaaS combining collaborative scheduling with secure document management for multi-user teams.

- Extended Calendar Plus with daily, weekly, and monthly recurring event scheduling, multi-user calendar sharing, automated conflict detection, color-coded tagging, and in-app notifications and reminders.
- Enhanced File Manager with in-browser PDF and image preview, advanced search and filtering, and role-based access control across user tiers, building on an existing folder hierarchy and upload/download layer.

Crown Restaurant - Multi-location Management System | React.js, TypeScript Jan 2024 - Aug 2024

- Built the platform end to end, delivering a centralized admin panel for menu, order, and reservation management across branches plus a responsive customer interface for browsing restaurants and placing orders.

PERSONAL PROJECTS

AI Interview Simulator - Live | interview-simulator-psi.vercel.app

Next.js 16, React 19, TypeScript, Tailwind v4, Radix UI, MediaPipe FaceMesh, Recharts, Node.js, Express, MongoDB.

- Built a full-stack AI mock-interview platform on a layered architecture (routes, controllers, services, AI engines) running adaptive interviews with real-time difficulty scaling, 5-dimension scoring, AI-generated follow-ups, and recruiter-grade reports.
- Engineered webcam-based proctoring in the browser with MediaPipe FaceMesh for real-time gaze and attention tracking, plus a voice mode scoring words per minute, filler words, and delivery confidence.
- Designed analytics dashboards with Recharts featuring skill radar and readiness scoring, and integrated JWT and Google OAuth authentication with Stripe subscriptions, webhooks, and refunds.
- Developed a Resume, GitHub, and Job-Description matching interface combining PDF parsing, repository analysis, ATS-style match scoring, and skill-gap detection.
- Designed a provider-agnostic AI engine using the factory pattern, enabling hot-swappable Gemini, Groq, and OpenAI backends without code changes.

3D Portfolio Website - Live | ankit-sinha70.github.io

React.js, Vite, Three.js, Tailwind CSS.

- Designed and deployed an interactive 3D portfolio with custom lighting, geometry, smooth camera controls, and scene transitions.
- Achieved a 90+ Lighthouse performance score through lazy loading, asset optimization, and responsive rendering across devices.

AI Resume Analyzer | github.com/Ankit-Sinha70

Next.js 14, TypeScript, Node.js, Express, OpenAI, Gemini, Groq.

- Built a full-stack TypeScript app extracting skills from PDF resumes via LLMs, scoring them against job descriptions, and generating actionable improvement suggestions behind a provider-agnostic AI layer with runtime provider switching and a mock mode for cost-free testing.
- Built a Next.js interface featuring drag-and-drop upload, dark mode, PDF export, and a normalized skill-matching engine that resolves synonyms such as k8s and Kubernetes to compute accurate match percentages.
- Structured the backend using Clean Architecture across domain, application, infrastructure, and interface layers in an npm-workspaces monorepo with shared types, Helmet, CORS, Zod validation, and Winston logging.

ACHIEVEMENTS

Reliable and Punctual in Project Deliveries - Brainerhub Solutions Mar 2024

- Recognized company-wide for consistent on-time delivery across 5+ client engagements, reducing release cycles by 15% through structured sprint planning, task automation, and proactive stakeholder communication.

EDUCATION

Bachelor of Arts, English Honours | Giridih College, Vinoba Bhave University, Jharkhand 2015 - 2018

- Self-taught engineer: completed structured React.js, Next.js, Angular, TypeScript, and Node.js coursework via Udemy and freeCodeCamp, applied across 5+ production-grade client and personal projects.
